

TITLE: GCN CIRCULAR  
NUMBER: 7469  
SUBJECT: GRB 080319B: optical observations  
DATE: 08/03/20 00:35:10 GMT  
FROM: Martin Jelinek at Inst.Astrophys.Andalucia,Granada <mates@iaa.es>

Martin Jelinek, Alberto J. Castro-Tirado (IAA-CSIC Granada),  
Virginie Chantry (Université de Liege) and  
Jorge Plá (IAC La Laguna), on behalf of a larger collaboration,

report:

"We are imaging the naked eye GRB 080319B detected by Swift  
(GCN 7427) using both the 1.2m Mercator Telescope at Obs. del  
Roque de los Muchachos in La Palma, and the 0.8m IAC80 at  
Obs. del Teide in Tenerife. Our R-band magnitude measured on  
an image starting at 22:56UT (16.75 hr after the burst) is  
about R=21.0. Further images are planned throughout the whole  
night."

This message can be cited.
